McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- [X] Project purpose and need
- [X] Visual/Aesthetic resources
- [ ] Proximity to residence
- [X] Land use (agriculture, residential, recreation/ tourism)
- [ ] Water resources (floodplains, wetlands, river crossings)
- [ ] Biological resources (wildlife habitat, raptors, endangered species)
- [X] Historic and cultural sites (landmarks, traditional cultural properties)
- [ ] Human health and safety (electromagnetic fields)
- [ ] Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

PROJECT WILL IMPACT EXISTING LAND USES,

What additional key issues should be addressed when assessing the potential impacts of the project?

75 FOOT EASEMENT WILL RUN THROUGH LAND USED FOR TIMBER.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- [x] Agriculture/Sivliculture
- [ ] Commercial
- [ ] Conservation Easement
- [ ] Industrial
- [x] Residential
- [ ] Other: _____

Physical Address of Property:
LAWTON FARM ROAD

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

LAND HAS BEEN FARMED AND TIMBERED FOR GENERATIONS

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

THERE IS NO INFORMATION ABOUT HOW MANY CUSTOMERS THIS WILL SERVE.

Your participation through commenting is essential throughout the entire environmental review process. If you would like to continue to receive information about the project and upcoming opportunities for participation through joining the mailing list, please check the following box and provide your mailing address.

- [ ] Yes, I would like to join the mailing list to receive information about the McClellanville transmission line project throughout its environmental review process.

McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☐ Project purpose and need
- ☑ Visual/Aesthetic resources
- ☑ Proximity to residence
- ☑ Land use (agriculture, residential, recreation/ tourism)
- ☑ Water resources (floodplains, wetlands, river crossings)
- ☑ Biological resources (wildlife habitat, raptors, endangered species)
- ☑ Historic and cultural sites (landmarks, traditional cultural properties)
- ☑ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

Land Use - Agriculture, residential/ Recreation (tourism).

What additional key issues should be addressed when assessing the potential impacts of the project?

Individuals of the AREA'S effects that it has upon our health in the future for generations to come.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☐ Residential
- ☑ Other: _____

Physical Address of Property:
Jamestown Area

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

It reduces the choices upon family property to choose a site to build a home.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

NO - it was so confused - Needs to be presented more clearly so local folks can understand better.

Your participation through commenting is essential throughout the entire environmental review process. If you would like to continue to receive information about the project and upcoming opportunities for participation through joining the mailing list, please check the following box and provide your mailing address.

- [x] Historic and cultural sites (landmarks, traditional cultural properties)
- [x] Human health and safety (electromagnetic fields)
- [ ] Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

All of the above are affected. Presently 2 live within 1 mile of the proposed line in Jamestown S.C.

What additional key issues should be addressed when assessing the potential impacts of the project?

Wildlife habitat will be affected by this proposed line

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☑ Agriculture/Sivliculture
- ☐ Commercial
- ☑ Conservation Easement
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property: 501 Lawton Farm Lane

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

Future generations of our family will be affected by this proposed line if it goes through this property.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

No - not enough meetings to discuss a 110 million project

Your participation through commenting is essential throughout the entire environmental review process. OPPOSE This going through James Farm

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☑ Project purpose and need
- ☑ Visual/Aesthetic resources
- ☑ Proximity to residence
- ☐ Land use (agriculture, residential, recreation/ tourism)
- ☑ Water resources (floodplains, wetlands, river crossings)
- ☑ Biological resources (wildlife habitat, raptors, endangered species)
- ☑ Historic and cultural sites (landmarks, traditional cultural properties)
- ☑ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

Proximity of residence which will be intruded.

What additional key issues should be addressed when assessing the potential impacts of the project?

Impact on wildlife
Division of inheritable land. land can never be used due to eminent domain. Electromagnetic generation of radiation effecting people and wildlife.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property:

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

This project affects my mama's & my grandmothers property - property that we will own someday. Therefore I don't want to see a huge electromagnetic field crossing this property

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

No How can you explain spending $110,000 million dollars be a project in a 30-45 minute presentation?

Your participation through commenting is essential throughout the entire environmental review process. McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- [ ] Project purpose and need
- [x] Visual/Aesthetic resources
- [x] Proximity to residence
- [x] Land use (agriculture, residential, recreation/ tourism)
- [ ] Water resources (floodplains, wetlands, river crossings)
- [x] Biological resources (wildlife habitat, raptors, endangered species)
- [x] Historic and cultural sites (landmarks, traditional cultural properties)
- [x] Human health and safety (electromagnetic fields)
- [x] Other: POWER LINES ABOVEGROUND ARE RUNNING ITLONG DISTANCES

Which of these resources are of the greatest importance within the project area, in your opinion?

PROXIMITY TO RESIDENTS, BIOLOGICAL RESOURCES, HUMAN HEALTH AND SAFETY

IT IS DANGEROUS TO HEALTH TO HAVE HIGH VOLTAGE LINES CHOSE TO HOMES, IN OUR AREA WE HAVE BEAUTIFUL WOOD PECKERS. I SAW A IVORY BILL WOOD PECKER ON MY PROPERTY. THERE IS NO NEED TO DESTROY ANY THING LIKE THIS. THE LINE CAN COME FROM BELLEISLE AND GO UNDERGROUND AT THE SANTEE RIVERS THERE WILL BE WIND MILLS FOR POWER OFF THE COAST OF MCCLELLAN VILLE

What additional key issues should be addressed when assessing the potential impacts of the project?

destroying property values

destroying animal habitat

long distance verses short ~~distace~~ distance

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

the shortest distance is from Belle Isle or from Mt. Pleasant. High way 17 is four lanes and the line can be run beside this highway.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☑ Residential
- ☐ Other: _____

Physical Address of Property:
119 Zoe Zack trail zip 29453

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

My property adjoins the National Forest. I do a lot of Bird watching. I had the thrill of seeing a Ivory Bill woodpecker at this location. A high voltage line would destoy this Bird habitat and mak my home sight useles for me. It took me a life time to get this property. the Birds need protection

FAIRFIELD PLANTATION
MCCLELLANVILLE, SOUTH CAROLINA 29458

10/28/10

Dear Sirs;
RE: McClellanville 115 KV
Transmission line.

My wife and I couldn't be more opposed to running the proposed McClellanville power line accross the Santee Delta! Using <u>any</u> of the proposed corridors!

Our views are based on the incredible esthetic, environmental, and historic value of the area.

We would support either of the 2 Charity to McClellanville proposals

er.

despite their higher costs —
especially when you consider
amortizing these costs
over 40 years or so.

Sincerely,
Thomas Pinckney

Thank you for your participation!

McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☐ Project purpose and need
- ☐ Visual/Aesthetic resources
- ☑ Proximity to residence
- ☐ Land use (agriculture, residential, recreation/ tourism)
- ☐ Water resources (floodplains, wetlands, river crossings)
- ☐ Biological resources (wildlife habitat, raptors, endangered species)
- ☐ Historic and cultural sites (landmarks, traditional cultural properties)
- ☑ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

1. Human health + safety: the option to install High Voltage lines to run from Jamestown Power Station will transit within 100 yards from our land + homes.

What additional key issues should be addressed when assessing the potential impacts of the project?

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☑ Residential
- ☐ Other: _____

Physical Address of Property:
678 Hartley Hill Rd, Jamestown

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

Your participation through commenting is essential throughout the entire environmental review process. If you would like to continue to receive information about the project and upcoming opportunities for participation through joining the mailing list, please check the following box and provide your mailing address.

☑ Yes, I would like to join the mailing list to receive information about the McClellanville transmission line project throughout its environmental review process.

Which of these resources are of the greatest importance within the project area, in your opinion?

Water Resources

What additional key issues should be addressed when assessing the potential impacts of the project?

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- [x] Agriculture/Sivliculture
- [ ] Commercial
- [ ] Conservation Easement
- [ ] Industrial
- [ ] Residential
- [ ] Other: _____

Physical Address of Property:

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

My grandmother owns property in Jamestown - and the proposed power line will cut across wet lands.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

No.

Central Electric's financial statement shows that they spend annually 11.7 million dollars in administrative costs for 39 employees. It is clear that this project is simply a way for C.E. to make more money.

McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☐ Project purpose and need
- ☑ Visual/Aesthetic resources
- ☐ Proximity to residence
- ☑ Land use (agriculture, residential, recreation/ tourism)
- ☑ Water resources (floodplains, wetlands, river crossings)
- ☑ Biological resources (wildlife habitat, raptors, endangered species)
- ☑ Historic and cultural sites (landmarks, traditional cultural properties)
- ☐ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

All indicated above.

What additional key issues should be addressed when assessing the potential impacts of the project?

1) Protected lands need to be updated - contact The Nature Conservancy for current data; 2) Cultural Sites - Old Georgetown Rd / Kings Hwy extend to South Santee River (Brittons Neck Alt.) = should be excluded! 3) Santee River Mig. Bird Area - entire upper & lower Delta are critical - should be excluded; 4) Alt. Corridor Comparision Table / Wetlands - Data Inaccurate i.e. NO estuarine wetlands in Honey Hill or Jamestown Corridors' percentages do not add up - entire table needs recalculation

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☑ Agriculture/Siviculture (17,000 acres)
- ☐ Commercial
- ☑ Conservation Easements (4 in project area, totalling 3,000 acres)
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property:

Georgetown Cty - 2 properties along Highway 17
Charleston Cty - 2 properties in South Santee drainage

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

White Oak Forestry Corp. owns & manages 17,000 acres in general Project Areas. We strongly object to all alternatives involving Bells Isle, Brittons Neck, Honey Hill & Jamestown corridors.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

No. As previously stated, all alternatives other than the General Charity Corridor should be totaled excluded from further consideration due to significant environmental and cultural impacts. In regard to the General Charity Corridor the existing distribution line (Hemlin Line) should be the only corridor considered for future consideration of potential enhanced electrical service

Your participation through commenting is essential throughout the entire environmental review process. Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☑ Project purpose and need
- ☐ Visual/Aesthetic resources
- ☐ Proximity to residence
- ☑ Land use (agriculture, residential, recreation/ tourism)
- ☑ Water resources (floodplains, wetlands, river crossings)
- ☑ Biological resources (wildlife habitat, raptors, endangered species)
- ☑ Historic and cultural sites (landmarks, traditional cultural properties)
- ☐ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

(1) Biological resources
(2) purpose/ need for project
(3) water resources

* I am attaching a copy of Ms Kate Parks comments from DOT as I fully concur with her comments

What additional key issues should be addressed when assessing the potential impacts of the project?

- Serious consideration to Charity options and utilization of existing Rights of way - PSNH power line & Road ways.
- More thorough investigation of cost effectiveness of Repairing n up grading existing facilities.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☑ Residential
- ☐ Other: _____

Physical Address of Property:
527 Pinckney ST, McClellanville SC
not IN a corridor

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

- None of the above were adequately addressed in the public meeting which dwelt on process of plan development.
- Needed: justification for line(s) to minimize Enc & Mullet Creek set process from CE/BSC.
- Financial justification - why needed at all.

Your participation through commenting is essential throughout the entire environmental review process. Which of these resources are of the greatest importance within the project area, in your opinion?

PROXIMITY TO MY RESIDENCE, DEVALUING OF MY PROPERTY.

What additional key issues should be addressed when assessing the potential impacts of the project?

LIFE CYCLE COSTS OF THE PROJECT

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☑ Residential
- ☐ Other: _____

Physical Address of Property:
1272 FRENCH SANTEE ROAD

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

THE PURPOSE AND DESCRIPTION WERE EXPLAINED, BUT THE ECONOMIC JUSTIFICATION OF THE PROJECT IS QUESTIONABLE.

Your participation through commenting is essential throughout the entire environmental review process. If you would like to continue to receive information about the project and upcoming opportunities for participation through joining the mailing list, please check the following box and provide your mailing address.

☑ Yes, I would like to join the mailing list to receive information about the McClellanville transmission line project throughout its environmental review process.

McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- [x] Project purpose and need
- [x] Visual/Aesthetic resources
- [x] Proximity to residence
- [x] Land use (agriculture, residential, recreation/ tourism)
- [x] Water resources (floodplains, wetlands, river crossings)
- [x] Biological resources (wildlife habitat, raptors, endangered species)
- [x] Historic and cultural sites (landmarks, traditional cultural properties)
- [x] Human health and safety (electromagnetic fields)
- [ ] Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

These are all important. I don't want to be looking at a power line crossing my grandmother's property or near my mother's property. There is already one in their front yards. I don't want the land use or value decreased. I don't want any wetlands, endangered species, historic/cultural sites affected. I especially don't want electromagnetic fields near where I live. I am opposed to a line from from Jamestown to McClellanville.

What additional key issues should be addressed when assessing the potential impacts of the project?

I think that the overall price of this project and future maintenance of any lines should be carefully considered. It seems like a lot of money to serve a few people. Alternate sources of electricity should be considered, such as solar or wind power.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property:

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

In your opinion, was the project description, purpose, and need fo the project adequately explained? If not, what additional informat is needed?

Not at meeting

Mr. Rutledge, Thank you for your comments. I have copied Ms. Emily Orler of RUS, Mr. Bill Rogers of Central Electric, and Mr. Leon Kolankiewicz & Ms. Nathalie Jacque of Mangi Environmental, who are tracking comments for this project. This email is now part of the official record and will be considered as the project team makes its decision. Again thank you and have a nice weekend –

To: McGee, Lauren - Washington, DC
Subject: McClellanville (SC) Transmission Line Proposal

Lauren, attached below are my comments in regard to the above-referenced matter. It is my considered opinion that of all the 10 proposed routes for the future power line location, the land around Hampton Plantation and down the Old Georgetown Road would be the most offensive route from a visual and historic point of view. Most of this land in this alternative (including ours) has been placed under conservation easements to protect it from unsightly development.

Bringing the proposed power line from Honey Hill to McClellanville, down Route 45, seems to me to be the best alternative from both a visual and historic position.

As an aside, spending $14,000,000 of the Government's money for this project seems to be a little over-kill, in my humble opinion, just to prevent power-outages during storms.. There are only about 200-250 homes which would benefit from this. That is about $56,000 per home. Probably most home owners would say, "give me $25,000 for the inconvenience of the storms, keep the other $36,000 and I will happily suffer the outage consequences."

Am I missing something here?

Hampton, Inc.

USDA
Rural Development
Rural Utilities Service
Environmental Review Process
McClellanville Transmission Line Proposal
Documents currently available for public viewing: AES and MCS
Alternatives Evaluation Study (AES):
• Identifies problem
• Evaluates ways of solving the problem
• Concludes with the best solution to the problem ("Proposed Action" or "Proposal")
Macro-Corridor Study (MCS):
• Provides background information about a proposal area
• Identifies ways to implement a Proposed Action ("Proposed Action Alternatives")
PUBLIC & AGENCY SCOPING (comments due: Oct 29, 2010)
Receive additional information from the public and agencies about the Proposed Action Alternatives. RUS will use the information provided during scoping to determine the issues that will be considered in the EIS.
Documents that will be available for public viewing/review:
• Scoping Summary Report: summarizes public and agency comments received during the scoping period
• Scoping Decision: summarizes issues that will be considered in the EIS; identifies the Proposed Action Alternatives that will be considered in detail in the EIS
• Draft EIS: analyzes impacts that the proposal may have on the human environment
• Final EIS: summarizes and responds to public and agency comments regarding the draft EIS; updates the Draft EIS
• Record of Decision (ROD): concludes the RUS NEPA process; summarizes the environmental conditions that will be implemented if RUS were to finance the proposal
* If a preferred action alternative crosses the Francis Marion National Forest, the U.S. Forest Service may issue a separate ROD for its federal action (e.g., possible issuance of a special use permit). This ROD would be subject to an appeals process as prescribed in the U.S. Forest Service's departmental regulations.
Issue Draft EIS and publish Notice of Availability (NOA) of Draft EIS in local newspapers and Federal Register. Comments Due: 45 days after the U.S. Environmental Protection Agency (EPA) receives draft EIS
Spring/Summer 2012
Hold Public Hearings & Receive Comments on Draft EIS.
Review and evaluate comments received, Update EIS.
Issue Final EIS and publish NOA of Final EIS in local newspapers and Federal Register. Review period: 30 days following the EPA receipt of Final EIS
Public and Agency Review of Final EIS.
Issue ROD and publish NOA of ROD in local newspapers and Federal Register.

Thank you for your participation!

McCellanville 115kV Transmission Line
Public Scoping Comment Form

We need your input! Public participation is an essential component of the environmental review process. Please fill out the following form to ensure that the review, and ultimately the decision, considers the affected communities' opinions.

Please check the following issues of concern regarding the construction of the transmission line:

- ☐ Project purpose and need
- ☑ Visual/Aesthetic resources
- ☐ Proximity to residence
- ☑ Land use (agriculture, residential, recreation/ tourism)
- ☐ Water resources (floodplains; wetlands, river crossings)
- ☐ Biological resources (wildlife habitat; raptors, endangered species)
- ☑ Historic and cultural sites (landmarks, traditional cultural properties)
- ☐ Human health and safety (electromagnetic fields)
- ☐ Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

Historic + Cultural sites
Visual

What additional key issues should be addressed when assessing the potential impacts of the project?

The visual impact on the Santee Delta, especially from Highway 17.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☐ Agriculture/Sivliculture
- ☐ Commercial
- ☑ Conservation Easement → ON 1,315 acres owned by HAMPTON, INC.
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property:
Rutledge Rd. + Old Georgetown Rd., McClellanville, SC 29458

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

Last December, 2009 we gave a Conservation Easement on 1,315 acres which is adjacent to Historic Hampton Plantation, built in 1730. This was to protect the land around this historic home from commercial development. The Nature Conservatory (TNC) holds the easement.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

Yes.

Your participation through commenting is essential throughout the entire environmental review process. If you would like to continue to receive information about the project and upcoming opportunities for participation through joining the mailing list, please check the following box and provide your mailing address.

- ☑ Yes, I would like to join the mailing list to receive information about the McClellanville transmission line project throughout its environmental review process.

What additional key issues should be addressed when assessing the potential impacts of the project?

LOOKING AT CHART - PRESENTED BY CENTRAL ELECTRIC AT THE MEETING - JAMESTOWN WAS NO. 3 OR 4 WITH FREQ. OF POWER OUTAGES NOT VERY GOOD - RECORD.

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- [X] Agriculture/Sivliculture
- [ ] Commercial
- [ ] Conservation Easement
- [ ] Industrial
- [X] Residential FUTURE
- [ ] Other: _____

Physical Address of Property:

184 CAMP DAVID TRAIL - JAMESTOWN SC 29453

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

I HAVE SOME OF THE SAME ENDANGERED SPECIES ON MY LAND AS FOREST SERVICE AND PLANTATION SUCH AS EASTERN WILD TURKEYS, BALD EAGLE, SWALLOW TAILED KITES AND VARIOUS TYPES OF DUCKS. YET US FOREST SERVICE CARRIES A HIGHER VALUES THAN MY LAND.

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

THE REP. FROM CENTRAL STATED THEY DID NOT NEED TO REPLACE OR BUILD SUB-STATION IN JAMESTOWN. YET - BERKELEY CO-OP INC. HAS PURCHASED LAND ADJOINING THE SANTEE COOPER TRANSMISSION LINE - NOT TO FAR FROM EXISTING SUBSTATION, FOR THE SOLE PURPOSE OF PLACING A SUBSTATION ON THIS PROPERTY. THE COST WOULD ADD APPROX. 5 ~~MILLION~~ MILLION MORE TO THE COST OF THE JAMESTOWN ROUTE

Your participation through commenting is essential throughout the entire environmental review process. - [x] Human health and safety (electromagnetic fields)
- [ ] Other: _____

Which of these resources are of the greatest importance within the project area, in your opinion?

You will destroy part of my farm land

What additional key issues should be addressed when assessing the potential impacts of the project?

The heritage of the community

If you own property in one of the below proposed corridors, please indicate all the existing uses and provide the property's address:

- ☑ Agriculture/Sivliculture
- ☐ Commercial
- ☐ Conservation Easement
- ☐ Industrial
- ☐ Residential
- ☐ Other: _____

Physical Address of Property: 1282 French Santee Rd.

Please describe any special uses or circumstances on your property that you would like to be considered in the assessment of the project.

Historical Significance
Loss of income
Health concerns - I walk constantly where the power line is projected to go —

In your opinion, was the project description, purpose, and need for the project adequately explained? If not, what additional information is needed?

No. there were not enough Public meetings. The last one was held too far away for me to attend. It's complicated - it needs better explanation.

Your participation through commenting is essential throughout the entire environmental review process. Awendaw

Petition

We the undersigned respectfully request that Berkeley Electric Cooperative, Central Electric Power Cooperative and The Rural Utility Service do all it can do to provide the Awendaw – McClellanville – South Santee areas a reliable transmission line so that the community receives the same reliable power expected by all BEC members.

When compared to other areas on the Berkeley Electric Cooperative system, the area from Awendaw, to McClellanville, and out to South Santee are the areas with the least reliability; they are also the areas that are most vulnerable to storms and other outages due to the length of the distribution lines and the lack of a transmission line from an alternate direction as stated by Berkeley Electric Cooperative representatives to our community. This affects the power that we, the members of Berkeley Electric Cooperative, receive at our homes.

Petition

We the undersigned respectfully request that Berkeley Electric Cooperative, Central Electric Power Cooperative and The Rural Utility Service do all it can do to provide the Awendaw – McClellanville – South Santee areas a reliable transmission line so that the community receives the same reliable power expected by all BEC members.

When compared to other areas on the Berkeley Electric Cooperative system, the area from Awendaw, to McClellanville, and out to South Santee are the areas with the least reliability; they are also the areas that are most vulnerable to storms and other outages due to the length of the distribution lines and the lack of a transmission line from an alternate direction as stated by Berkeley Electric Cooperative representatives to our community. This affects the power that we, the members of Berkeley Electric Cooperative, receive at our homes.

Petition

We the undersigned respectfully request that Berkeley Electric Cooperative, Central Electric Power Cooperative and The Rural Utility Service do all it can do to provide the Awendaw – McClellanville – South Santee areas a reliable transmission line so that the community receives the same reliable power expected by all BEC members.

When compared to other areas on the Berkeley Electric Cooperative system, the area from Awendaw, to McClellanville, and out to South Santee are the areas with the least reliability; they are also the areas that are most vulnerable to storms and other outages due to the length of the distribution lines and the lack of a transmission line from an alternate direction as stated by Berkeley Electric Cooperative representatives to our community. This affects the power that we, the members of Berkeley Electric Cooperative, receive at our homes.
